

It's about time

From idea to product,
we take care of everything.

**VANTAGE
NUTRITION**
An ACG Group Company

Time is speed, efficiency and money.

We're all about making the most of time.

We understand better than anyone how speed-to-market translates to better business and increased market share.

We provide 360° solutions with integrity, care and efficiency.

We help get relevant consumer-centric products to market fast.

We design unique concept-to-consumer solutions for nutraceutical brands.

OUR CLIENTS

zomato

+DR. SHETH'S
-for indian skin-

PATANJALI

Reimagining nutrition... ...and doing it right.

Our unwavering focus on innovation and quality enables nutraceutical companies to quickly introduce new, highly-differentiated and strongly branded products to the market.

We help you expand product portfolios and sustain business growth.

We have the technology
and expertise to help you
get products to market faster.

We create reliable, high-quality solutions for nutraceutical
brands, with a genuinely customer-centric approach.

VANTAGE 360°

Our end-to-end solutions help you stay abreast of trends, and ensure you're first to market every time.

We enable, enhance, and differentiate brands through strategic consulting, market intelligence, innovation, and state-of-the-art manufacturing.

We can even help create a distinctive brand for you that will stand out in a crowded sector and command the attention of end consumers.

Strategic Consulting

From product conceptualisation to commercialisation, our experts design a strategy tailored to your specific requirements.

Market Intelligence

We advise you on global trends and consumer preferences to help you introduce future-ready products quickly and efficiently.

Innovative Technology

Our Liquid Encapsulation V-fill™ Technology is the gold standard for nutritional ingredients encapsulated in hard capsules.

Manufacturing

Our world-class facility in Pune, India, is equipped with the latest liquid-fill technology, and highly prolific machines that meet international safety and regulatory standards.

Packaging

We uphold your brand's unique style of packaging, while also maximising product shelf life and ensuring damage-free delivery.

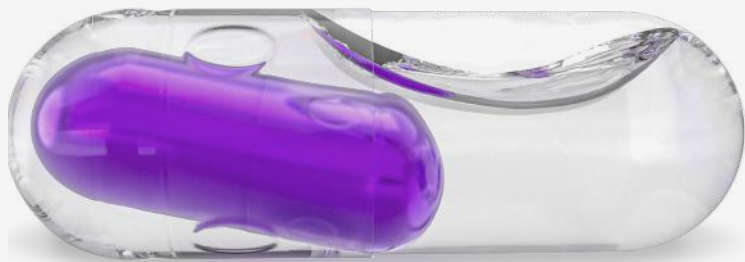

Brand Development

We partner with you on your journey to market, helping you to secure an impactful launch and stay ahead of the curve and competition.

VANTAGE 360°

7-step product launch

We help turn your ideas into products in just seven steps. Whether you're in the market for a full service partnership or you're looking for value additions, we've got you covered.

Select product

Once we understand your product requirements in detail, our experts will recommend a few concepts. You select the concepts that best suit your product, and we establish a scientific rationale along with ingredient selection and product claims.

Regulatory and feasibility check

We take care of all quality, regulatory, and safety concerns, while ensuring compliance with the guidelines and RDA limits for ingredients. We also carry out feasibility and market-availability studies to ensure better product positioning on launch.

Formula conceptualisation

Once the paper formula is ready, we send you the formulation specs for approval. At this point, we also establish product format and claims. We provide only the best formulas, to bring your products to life.

Product development

After completion of pre-formulation trials to assess ingredient compatibility, we optimise formulation of the final product on a lab-scale batch. We then develop the lab-scale product, and once approved, we take it to be scaled up to production

Stability studies

We follow ICH guidelines for stability studies to establish the product shelf-life.

Commercial manufacturing

We complete the technology transfer for batches and kickstart volume production.

Product launch

We help you launch and market your product, advising you on how to best position it to meet consumer needs and preferences.

Liquid-filled hard capsules

We can custom-make capsules to help you formulate innovative products effectively, with improved functionality, and save you significant time and money.

Pioneering liquid encapsulation V-fill™ technology

Consumer preference

Easier to swallow, they also work faster and more effectively, and are visually attractive.

Improved bioavailability

Facilitates multiple combinations of release profiles within a single vegetarian hard capsule.

Commercial benefits

Accurate dosing, consistency and uniformity of batches ensures maximum yield, and helps us make you a reliable brand for your customers.

Liquid-filled hard capsules vs Softgel capsules

Liquid-filled hard capsules are superior on multiple fronts:

Attributes	Liquid-filled hard capsules	Softgel capsules
Combination filling	✓	✗
High aesthetic appeal	✓	✗
No plasticiser	✓	✗
Lower oxygen permeability	✓	✗
Less risk of drug migration	✓	✗
Semi-solid filling at high temperature	✓	✗
Small-batch manufacturing	✓	✗

The Vantage USP

Our liquid capsule range offers significant benefits, not only to nutraceutical brands, but also consumers.

Enhanced product profile

Fast and sustained / controlled action.

Ingredient compatibility

Easy delivery of challenging formulations.

Unique product branding

Variety of colour and print options.

ACG capsules

High quality. Clean label. Vegetarian.

Encapsulation

Taste and odour-masking protection.

High product integrity

Tamper and leak-proof.

Combination-fill options

Liquids and mini capsules, granules and microtablets.

Innovative designs for custom formulations

Visually stunning products with novel formulations that will resonate with consumers.

Liquid-fill combinations in hard capsules offer a range of possibilities...

A signature concept that allows brands to use the versatility of capsules to incorporate two non-compatible formulations in a single capsule, phase ingredients' release, reduce the number of pills to be taken, enhance consumer convenience, and ensure compliance.

Vantage provides for all your product and brand needs

We expertly meet your nutraceutical brand's needs to ensure its success, by carefully designing and realising the desired nutritional and functional benefits.

Timely, efficient creation of early-trend products

Choose from our highly innovative, licensed, shelf-life tested products with patented and trademarked ingredients.

Innovative and safe concept formulations

Careful ingredient sourcing, meticulous research and verifiable standards of excellence help ensure superior product quality.

Customisation and branding

Vantage supports the launch of completely new concepts to market, as per your unique customisation specifications

- Printed capsules
- Novel ingredients

Pellets

Small, mighty, and in high demand.

Pellets are increasingly popular as they offer greater flexibility in designing and developing oral, solid dosage forms with a variety of benefits.

Multiple release profiles

Easy coating

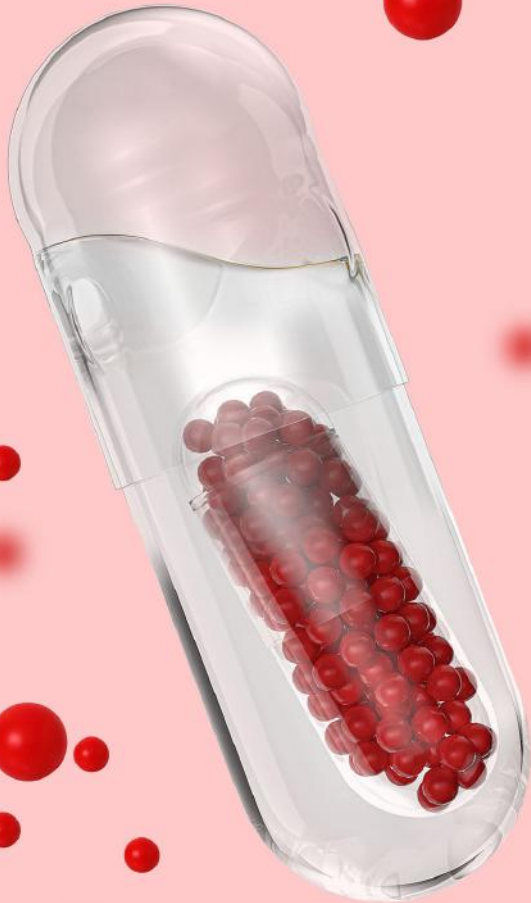

Easy to fill into capsules

Enhanced drug dissolution

Easy packaging

Side-by-Sides™

Patented dual-chamber capsule technology for more effective combination therapies.

- **Proprietary patented process:** Side-by-Sides has perfected its technology and production process, earning 80 registered patent awards worldwide over the course of a decade.
- **Innovative product delivery:** Our unique delivery system efficiently combines multiple ingredients in a single capsule, maximising convenience and potential benefits for users.
- **Movable membrane:** Side-by-Sides capsule technology utilises a revolutionary membrane diaphragm, allowing simultaneous delivery of incompatible substances. This game-changing innovation sets us apart.
- **Dual-delivery product:** Our liquid-filled Side-by-Sides capsules contain water and fat-based liquids necessary for optimal absorption of active ingredients, significantly improving bioavailability and potentially reducing side effects. Ongoing research focuses on enhancing the benefits through immediate and delayed release combinations.

We use a fluidised bed processor with bottom- and top-spray capabilities.

- Achieving different release profiles
- Enteric coated formulations
- Sprinkle formulations (for paediatric and geriatric patients)
- Taste masking
- Protecting acid-sensitive ingredients
- Food fortification

Entirely automated process with no manual interventions

Pellets with smooth surfaces and uniform coating

We manufacture our pellets in a fluid-bed Wurster coater, using a layering technique that guarantees consistent quality across all batches.

Our fluid-bed processor technology is completely automatic, faster, and ensures consistency of product output.

Ingredient processing

We are committed to processing safe, high-quality ingredients.

From agglomerate-free blends to finely coated granules, we provide a range of proven ways to get your product from lab to market.

Technology and expertise

Our high-tech fluid-bed processor, along with our technical know-how and state-of-the-art manufacturing facilities, ensure a superior quality product with research-backed ingredients.

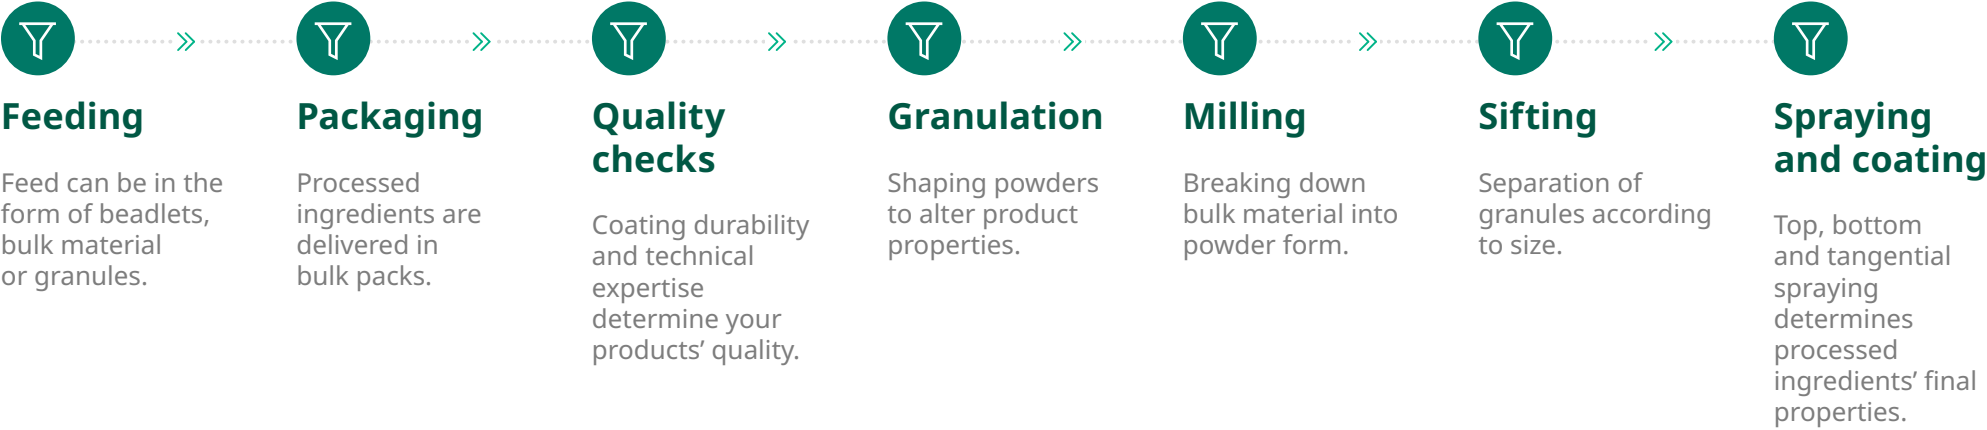

Our ingredient processing services:

- effortlessly augment your production capacities.
- secure and sustain efficiencies.
- improve your productivity.
- lower operating costs.

We specialise in ingredient granulation and coating.

Our clients love working with us...

“

We are really impressed by the insightful feedback we received from team Vantage, and their promptness in response to our requests. We are now keen on partnering with Vantage for some of our future projects too.

Mr. Shashikant Shinde
Product Development In Charge

“

My experience with Vantage has been great right from the get-go. They have helped us with a unique formulation in a unique dosage form and scaled it with ease. I would strongly recommend them.

Dr. Aneesh Sheth
CEO, Fusion Cosmetics

“

Vantage Nutrition helped us with uninterrupted manufacturing and technical support, which allowed us to ensure continuous supply of our dietary supplements to consumers.

Dr. Vikrant Suryavanshi
Director
